

Lens nnect® SERIES

TELECENTRIC LENS

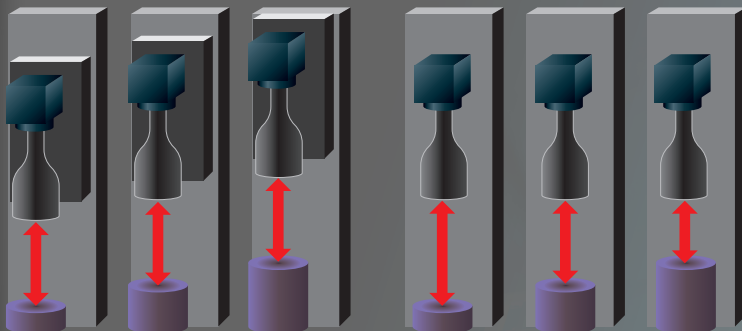

Motorized telecentric lens

that can be **easily operated** with **a single USB cable!**

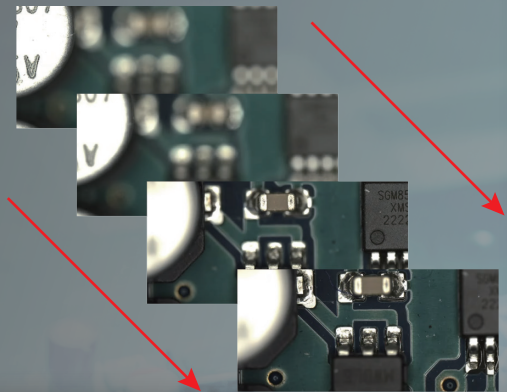

- ➔ Focus can be controlled via USB.
- ➔ Precise adjustment by stepping motor.
- ➔ High resolution to the edges of image by inner focus.
- ➔ Easy operation, just plug and play.
- ➔ Motorized Z-stage not required.

Using the LensConnect focus adjustment, it can modify focus even if the distance from the lens to the object (WD) changes.
